<https://www.huntleigh-diagnostics.com>

### L&R Medical

L&R, leg ulcers affect a large number of patients, it's therefore essential that we empower patients to manage and care for themselves, to promote their independence and reduce the hours spent on care whilst improving outcomes.

<https://www.lohmann-rauscher.co.uk>

#### **medi UK**

Medi are the global leaders in venous health care. Visit us to see our latest concepts.

medi's wound care pathway: Assess with the world's fastest way to record ankle brachial pressure index (ABPI) — MESI ABPI MD. This device provides an accurate reading in one minute, with no need for resting before testing. This helps you to quickly and accurately determine if your patient is suitable for

treatment with compression.

Clean and debride with UCS pre-moistened debridement cloth. Its soft loop technology helps to catch wound debris and slough, and both sides can be used. It is also sterile and ready to use and half the cost of similar debridement products. The solution in the cloth helps to disrupt and remove biofilm, soften dry areas and enable healing.

Heal venous leg ulcers with juxtalite — the only adjustable Velcro device with measurable compression. Eight sizes and two lengths for all stages of venous disease. We don't just treat leg ulcers, we heal them.

Lymphology therapy chain concept (for treatment of chronic oedema/lymphoedema):

Skin care — soften hyperkeratosis and reduce the risk of cellulitis with UCS, the only pre-moistened debridement cloth available on prescription.

Reshape — improve the shape and reduce limb volume with juxtafit, an instantly re-adjustable wrap device with measurable compression, which comes with 12 months warranty.

Maintain — it is important to keep the reduced limb in the best shape possible. This is easy with our wide range of flat-knit hosiery, such as the mediven mondi range, which is available in many colours and at no extra charge.

<http://www.mediuk.co.uk>

#### **Microworld**

Healing wounds can be complex, learning how to doesn't need to be. Fun, interactive and engaging content tailored to improve

your understanding of wound care. Whether you're a student, patient or healthcare professional, the Microworld has been developed to help you make more informed decision in the future.

Microworld is a free-subscription based education platform that provides patients, students and healthcare professionals access to engaging, interactive, CPD validated, animated medical content that helps further the understanding of advanced wound care
