

Day 1 1st March 2023

08.30–10.00	Registration and exhibition
10.00–10.15	Opening remarks and introduction of event chair by Helen Shoker, <i>clinical director, Wound Care Today</i> and Paul Vaughan, <i>deputy director, Primary Care Nursing and NextGen Nurse, NHS England</i>
10.15–11.30	Fly higher Sarah Furness, <i>ex RAF combat helicopter pilot and squadron leader, mindfulness coach, human performance facilitator, best selling author of 'Fly Higher', and founder of Well Be It</i>
11.30–11.50	All Our Health Framework: what is it, why it matters, and your role as an advocate Professor Jamie Waterall, <i>deputy chief nurse, Office for Health Improvement</i> Know your demographics — examples from practice, who to link with, what/how to take back into practice
11.50–12.00	Questions from the audience
12.00–14.00	Lunch/exhibition/skills zone
14.00–14.10	An introduction to the International Lymphoedema Framework (ILF) Professor Christine Moffatt CBE, <i>chair person, International Lymphoedema Framework (ILF)</i>
14.15–14.50	Patient choice, concordance and engagement International speaker: Dianne Rudolph, <i>nurse practitioner, San Antonio Wound Care, USA</i>
14.50–15.10	Reducing inequalities in wound care, case studies — question and answer discussion panel Keith Harding, Gemma Clayworth, <i>clinical lead/tissue viability specialist, Telford and Shropshire Wound Healing Service</i>
15.10–15.15	Questions from the audience
15.15–16.15	Break/exhibition/skills zone
16.15–16.45	Closing the gap: reducing wound care inequality across different care settings Lauren Thorpe, <i>clinical nurse specialist in wound care, Coventry and Warwickshire Partnership Trust</i>
16.45–17.45	Wound care delivery within the ICB structure: opportunity, challenge or threat? An opportunity to have your say Christine O'Connor, Helen Shoker, <i>lead nurse, Coventry and Warwickshire Partnership Trust</i> , Siobhan Mccoulough, <i>lead tissue viability nurse, University Hospital Plymouth</i> , Cerys Stowe, <i>tissue viability nurse, Hampshire Hospitals NHS Trust</i>
17.45–18.00	Summary/evaluation of today's event

Day 2 2nd March 2023

08.30–9.00	Exhibition opens
09.00–09.10	Welcome and open of day two Paul Vaughan, <i>deputy director, Primary Care Nursing and NextGen Nurse, NHS England</i>
09.10–09.40	Importance of outcomes data in evaluating wound healing services in different care settings John McRobert, <i>clinical director, Pioneer Wound Healing and Lymphoedema Centres</i>
09.40–10.10	The opportunity to heal compromised skin integrity and hard-to-heal wounds Alison Parnham, <i>teaching associate clinical nurse specialist — tissue viability, School of Health Sciences, University of Nottingham</i>
10.10–11.10	Break/exhibition/skills zone
11.10–12.00	First-time speaker sessions
12.00–12.20	Diabetic foot ulcer homeless project Emily Haworth, <i>clinical lead podiatrist, Swansea Bay University Health Board</i>
12.20–12.30	Questions from the audience
12.30–14.00	Lunch/exhibition/skills zone
14.00–14.45	Free paper sessions
14.50–15.30	Value of digital tech and data in wound care Professor Jenni Macdonald, <i>nurse consultant, tissue viability, Acute, Primary and Community Care, NHS Lothian</i>
15.30–15.45	Professional reflection — taking action Paul Vaughan, <i>deputy director, Primary Care Nursing and NextGen Nurse, NHS England</i>
15.45–16.00	Summary/evaluation and close of event

Skill zones

These sessions will run throughout the two-day event.

Skill zone 1

in association with
L&R

Are you ready to wrap?

This skill zone takes a practical look at: starting the self-care conversation with patients; how to assess patients' suitability for self-care compression garments; getting hands on with compression wrap systems.

Nicola Fitzpatrick, Julie Brown and Vicky Forknall,
all clinical advisors, L&R

People.Health.Care.

Skill zone 2

in association with
S&N

Hands on with negative pressure wound therapy

As you already know, not all wounds heal easily. What if there was a simpler way to cut through some of these challenges. Fuelled by multiple comorbidities and complex patient populations, demand for advanced technologies is spiking across the care continuum. Negative pressure wound therapy (NPWT) doesn't need to be complicated. Come and join us for a real practical hands on experience to see how NPWT can be a simple, comprehensive active treatment, suitable for incisional, acute and non-healing wounds.

Amanda O'Dell, *incision specialist*; **Andy Owen**, *account manager*,
both at Smith & Nephew

Smith+Nephew

Skill zone 3

in association with
Convatec

Exudate management: a novel approach to dressing selection

Effective exudate management helps to proactively manage patients' wounds towards healing. This hands-on session covers the basics of exudate management, including causes, solutions and appropriate dressing selection criteria. This novel approach to dressing selection also covers a practical cutting workshop.

Dale Copson, *clinical strategy manager*; **Lisa Turley**, *clinical strategy manager*,
both at Convatec

— forever caring —

Skill zone 4

in association with
Healthy.io

Digital wound assessment and management using smartphone technology

In the digital wound management skill zone, delegates can gain hands-on experience of a digital wound assessment tool and see how digital systems have been implemented to deliver best practice pathways at York and Scarborough Teaching Hospitals NHSFT. Leave your rulers and paper behind — come along and measure, assess and analyse wounds using only a smartphone app!

Keeley Chapman and Laura Hay, *both tissue viability nurses*,
York and Scarborough Teaching Hospitals

Skill zone 5

Debridement skills

This skill zone demonstrates the skill of debridement — in particular, focusing on curettage to remove devitalised tissue from the wound bed.

John McRobert, *clinical director*; **Pam Cooper**, *clinical partner*,
both at Pioneer Wound and Lymphoedema Centre
